

Smart Critical Facility Operations

Unified Critical Infrastructure Management Platform

Monitor • Predict • Automate • Maintain • Secure • Sustain

Why GTS

Unified operations

AI-driven operations

Integrated sustainability

Secure critical infrastructure

Autonomous operation

www.gtsco-uae.com

CRITICAL FACILITY MANAGEMENT

ADVISORY & ASSESSMENT SERVICES

ASSESS • OPTIMIZE • SUSTAIN • TRANSFORM

GTS helps telecom and data center operators assess, optimize and future-proof their critical infrastructure for **reliability, efficiency** and **sustainability**.

SERVICES

Critical Facility Assessment

Evaluate infrastructure, systems and operations to identify risks and opportunities.

Data Center Operational Assessment

Assess performance, reliability and efficiency of data center operations.

Telecom & Site Assessment

Review shelters and remote sites for availability, security and compliance.

Asset Lifecycle Assessment

Analyze asset health and lifecycle stages to optimize value.

DELIVERABLES

Assessment Report

Comprehensive findings on current environment and key improvement opportunities.

Future-State Analysis

Comparison with recommended future-state model and benefits.

Risk Assessment

Identification and prioritization of operational, technical and business risks.

Optimization Plan

Cost analysis, optimization opportunities and financial impact for improved ROI.

REDUCE RISK

Enhance resilience and ensure business continuity.

OPTIMIZE COSTS

Improve efficiency and reduce operational costs.

IMPROVE PERFORMANCE

Increase reliability, availability and service quality.

ENHANCE SUSTAINABILITY

Align with ESG goals and drive environmental responsibility.

ACHIEVE EXCELLENCE

Build a future-ready, smart and efficient organization

Building Resilient, Intelligent & Sustainable Critical Facilities for Tomorrow.

GTS - Smart & Sustainable Solutions

UNIFIED CMMS / EAM PLATFORM SERVICES

SMARTER MAINTENANCE. STRONGER ASSETS. SUSTAINABLE OPERATIONS.

GTS delivers a unified CMMS/EAM platform to help organizations manage **assets**, automate **maintenance**, and optimize **operations** across multiple sites.

SERVICES

CMMS Implementation

End-to-end implementation of a modern, scalable and user-friendly CMMS platform.

Enterprise Asset Management (EAM)

Centralized asset data, tracking, and performance optimization across the asset lifecycle.

Preventive Maintenance Automation

Automate schedules, inspections, and maintenance tasks to prevent failures and reduce downtime.

Work Order Automation

Streamline work order creation, approval, assignment and tracking to improve efficiency and accountability.

Asset Lifecycle Management

Manage the entire lifecycle of assets from procurement to retirement for better control and ROI.

Spare Parts & Warehouse Management

Optimize inventory, streamline procurement, and ensure the right parts are available when needed.

Vendor & Contractor Management

Manage vendors, contracts, performance and compliance in one centralized platform.

Mobile Field Service Platform

Empower field technicians with mobile access to work orders, assets and real-time updates.

SLA Management

Define, monitor and track SLAs to ensure quality service and compliance.

Multi-site Operations Management

Manage maintenance operations across multiple sites with visibility, consistency and control.

MANAGED SERVICE OFFERING

CMMS-as-a-Service

Cloud-based CMMS solution with hosting, updates and support.

Asset Management-as-a-Service

Outsource asset management for better visibility, compliance and control.

Maintenance Operations-as-a-Service

End-to-end maintenance operations management to ensure reliability and uptime.

HIGHER ASSET AVAILABILITY

Minimize failures and maximize uptime

LOWER COSTS

Reduce maintenance and operational costs

IMPROVED PRODUCTIVITY

Empower teams with smart automation

BETTER DECISIONS

Real-time data and analytics for leaders

STRONGER COMPLIANCE

Ensure regulatory and audit readiness

SUSTAINABLE OPERATIONS

Drive sustainability through efficiency

SMARTER ASSETS. EFFICIENT OPERATIONS. SUSTAINABLE FUTURE.

PEOPLE

PROCESS

TECHNOLOGY

SUSTAINABILITY

GTS leverages AI, machine learning and intelligent automation to help organizations achieve higher **reliability**, **lower costs**, and **smarter operations** across their critical infrastructure.

SERVICES

-  **Predictive Maintenance**
Predict equipment failures before they happen.
-  **AI Anomaly Detection**
Detect unusual patterns and potential issues.
-  **AI Operational Optimization**
Optimize resources and performance using AI insights.
-  **AI-driven Incident Management**
Accelerate resolution with AI insights and automation.
-  **Smart Technician Dispatching**
Dispatch the right technician with the right skills.

AI CAPABILITIES

-  **Detect Temperature Trends**
Continuously monitor and detect rising temperature trends.
-  **Trigger Alerts**
Intelligently trigger alerts based on AI-detected anomalies.
-  **Auto-create Work Orders**
Automatically create work orders when issues are detected.
-  **Auto-assign Technicians**
Automatically assign the most suitable technician.
-  **Predict Failures**
Predict equipment failures and prevent unexpected downtime.

MANAGED SERVICES

-  **AIOps-as-a-Service**
End-to-end AIOps solution managed by GTS experts for proactive, intelligent and autonomous operations.
-  **Predictive Maintenance-as-a-Service**
Continuous monitoring, predictive analytics and maintenance management to maximize uptime and asset life.

AI-POWERED OPERATIONAL FLOW

AI • AUTOMATION • INSIGHTS

Driving Smarter, Faster, and Autonomous Operations

REDUCE DOWNTIME
Predict issues early and prevent disruptions.

LOWER COSTS
Optimize resources and reduce operational expenses.

IMPROVE RELIABILITY
Enhance system health and operational resilience.

INCREASE EFFICIENCY
Automate processes and improve team productivity.

SMARTER DECISIONS
AI-driven insights for faster and better decision making.

SUSTAINABLE OPERATIONS
Optimize energy and reduce environmental impact.

GTS helps organizations build a **sustainable future** through data-driven ESG strategies, **intelligent monitoring**, and **operational excellence**.

SERVICES

-  **ESG Reporting Platform**
Streamlined ESG data collection, management, and reporting aligned with global frameworks.
-  **Sustainability KPI Dashboards**
Real-time dashboards to track, analyze and improve sustainability performance.
-  **Carbon Footprint Tracking**
Measure, monitor and reduce Scope 1, 2 and 3 emissions with precision.
-  **Energy Optimization**
Optimize energy consumption and reduce operational costs with smart analytics.
-  **PUE Monitoring**
Monitor and optimize Power Usage Effectiveness for data centers.
-  **E-waste Management**
Responsible e-waste collection, recycling and compliance management.
-  **Green Operations Consulting**
Expert consulting to build greener, more efficient and resilient operations.
-  **ISO 14001 Readiness**
Support for environmental management system implementation and certification.

OUR ESG PILLARS

MANAGED SERVICES

-  **ESG Monitoring-as-a-Service**
End-to-end ESG monitoring and reporting managed by GTS experts.
 - Continuous data monitoring
 - ESG compliance tracking
 - Automated reporting
 - Expert insights & recommendations
-  **Sustainability Operations Center**
Centralized operations center focused on driving sustainability excellence.
 - 24/7 monitoring & analytics
 - Performance optimization
 - Incident management
 - Sustainability advisory

 **Driving measurable impact.**
Building a sustainable future together.

REDUCE ENVIRONMENTAL IMPACT
Lower emissions, waste and resource consumption.

IMPROVE OPERATIONAL EFFICIENCY
Optimize energy and resources for cost savings.

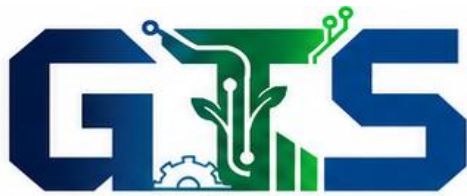

ENSURE COMPLIANCE & RISK MANAGEMENT
Meet global ESG standards and regulations.

ENHANCE REPUTATION & STAKEHOLDER TRUST
Strengthen brand value and investor confidence.

CREATE LONG-TERM VALUE
Build a resilient and sustainable business for the future.

SMART & SUSTAINABLE SOLUTIONS

SECURE IoT & CRITICAL INFRASTRUCTURE CYBERSECURITY SERVICES

SECURE. PROTECT. MONITOR. RESILIENT.

GTS delivers end-to-end cybersecurity solutions to protect your IoT, OT and critical infrastructure from evolving threats while ensuring **operational continuity** and **compliance**.

SERVICES

Secure IoT Architecture

Design and implement secure IoT architectures with zero trust, segmentation and encryption.

OT / IoT Cybersecurity Assessment

Assess OT and IoT assets, identify risks, vulnerabilities and security gaps.

Secure BMS/DCIM Integration

Ensure secure integration of BMS, DCIM and operational systems.

Vulnerability Assessment

Perform continuous vulnerability scanning and penetration testing.

SIEM Integration

Integrate with enterprise SIEM for real-time threat detection and alerting.

Secure Remote Monitoring

Enable encrypted, secure remote access and monitoring for critical environments.

Critical Infrastructure Protection

Protect OT, IoT and IT assets from evolving cyber threats and attacks.

PROTECTING WHAT POWERS THE WORLD

MANAGED SERVICES

OT SOC-as-a-Service

24/7 OT Security Operations Center for continuous monitoring, threat detection and incident response.

- Threat monitoring
- Incident response & escalation
- Security analytics
- Compliance & reporting

Cyber Fusion Monitoring

Unified monitoring of IT, OT and IoT environments for complete visibility and faster response.

- Threat correlation across environments
- Real-time dashboards
- Proactive threat hunting
- Actionable insights

TOOLS & FUNCTIONS

Asset Discovery & Inventory

Discover and inventory all IT, OT and IoT assets.

Threat Detection & Monitoring

Real-time detection of threats, anomalies and suspicious activities.

Vulnerability Management

Continuous vulnerability scanning and risk prioritization.

Log Management

Centralized log collection, normalization and analysis.

Security Information & Event Management (SIEM)

Correlate events, detect incidents and generate alerts.

Network Security Monitoring

Monitor network traffic, connections and protocols for threats.

Endpoint & Device Protection

Protect endpoints, IoT devices and industrial controllers.

Compliance & Reporting

Generate compliance reports and support audits (ISO, NIST, IEC 62443).

ENHANCED SECURITY

Protect critical assets from advanced threats.

24/7 PROTECTION

Round-the-clock monitoring and rapid response.

REDUCED RISK

Identify and mitigate risks before impact.

OPERATIONAL RESILIENCE

Ensure business continuity and uptime.

SUSTAINABLE FUTURE

Secure operations today for a sustainable future.

SECURER INFRASTRUCTURE.
PROTECTED OPERATIONS. SUSTAINABLE FUTURE.

www.gtsco-uae.com

GTS - Smart & Sustainable Solutions

SMART & SUSTAINABLE SOLUTIONS

FIELD OPERATIONS & MANAGED WORKFORCE SERVICES

SMART WORKFORCE. SEAMLESS OPERATIONS. MAXIMUM IMPACT.

GTS delivers **intelligent field operations** and managed workforce solutions to ensure high performance, **operational continuity** and **customer satisfaction** across all critical environments.

SERVICES

Field Technician Dispatch

Intelligent scheduling and dispatching of skilled technicians for faster resolution.

Mobile Workforce Management

Manage field teams in real-time with mobile apps and live tracking.

AMC Management

End-to-end management of AMC contracts, renewals, compliance and performance.

Vendor Coordination

Seamless coordination with vendors and service partners for timely execution.

Remote Support

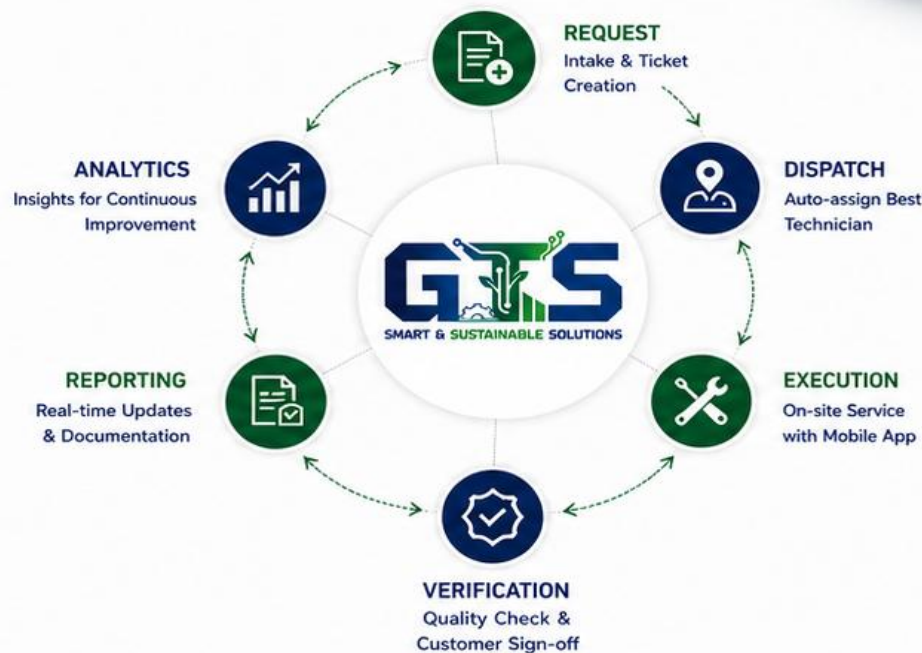

Provide remote assistance and issue resolution to reduce downtime.

Smart Workforce Analytics

Data-driven insights to optimize productivity, performance and resource utilization.

END-TO-END FIELD OPERATIONS ECOSYSTEM

MANAGED SERVICES

Facility Operations Outsourcing

Complete outsourcing of facility operations including:

- Infrastructure management
- Preventive & corrective maintenance
- Compliance management
- Vendor & SLA management
- Reporting & analytics

Smart Remote Operations

Centralized remote monitoring and operations management for:

- Remote issue detection & resolution
- 24x7 monitoring support
- Event management
- Performance dashboards
- Reduced on-site visits

KEY BENEFITS

FASTER RESPONSE

Quick dispatch and issue resolution.

HIGHER PRODUCTIVITY

Smarter scheduling and resource optimization.

BETTER VISIBILITY

Real-time tracking and transparent operations.

COST EFFICIENCY

Reduce downtime and operational costs.

COMPLIANCE & QUALITY

Ensure SLA adherence and service quality.

SMART WORKFORCE. SMARTER OPERATIONS. SUSTAINABLE FUTURE.

www.gtsco-uae.com

GTS - Smart & Sustainable Solutions

SMART & SUSTAINABLE SOLUTIONS

DATA WIPING & E-WASTE MANAGEMENT SERVICES

SECURE DATA. RESPONSIBLE DISPOSAL. SUSTAINABLE FUTURE.

GTS helps organizations **securely** erase data, responsibly retire assets, and manage e-waste in an environmentally **sustainable** way while ensuring **compliance** and **data security**.

SERVICES

Secure Data Wiping

Industry-standard data sanitization for all storage media.

IT Asset Disposal

Secure collection and disposal of IT assets across all locations.

E-Waste Management

Environmentally responsible recycling of electronic waste.

Asset Retirement Lifecycle Management

End-to-end lifecycle management from deployment to retirement.

Certified Destruction Services

Physical destruction of drives and devices with certification.

White-label E-Waste Service

Branded e-waste management solution for partners and resellers.

ASSET RETIREMENT LIFECYCLE

WE ARE COMMITTED TO A GREENER PLANET

Reduce Carbon Footprint

Promote Circular Economy

Ensure Data Security

Comply with Global Regulations

BUSINESS MODELS

MANAGED SERVICE

End-to-end managed solution including collection, data wiping, disposal, reporting and compliance.

PER ASSET

Flexible pricing based on asset type and quantity.

WHITE-LABEL PARTNER MODEL

Offer branded e-waste services under your brand with full operational support from GTS.

OUR PROCESS

COLLECTION
Secure pickup of assets

INSPECTION
Asset tagging and inspection

DATA WIPE / DESTRUCTION
Data sanitization or physical destruction

RECYCLING
Environmentally responsible recycling

CERTIFICATION
Certificate of data wiping or destruction

KEY BENEFITS

DATA SECURITY

Ensure sensitive data is permanently erased.

REGULATORY COMPLIANCE

Meet global standards & industry regulations.

COST OPTIMIZATION

Maximize asset value and reduce disposal costs.

ENVIRONMENTAL IMPACT

Reduce e-waste and promote sustainability.

TRANSPARENCY

Complete visibility with reports and certificates.

SECURE DATA. RESPONSIBLE DISPOSAL. SUSTAINABLE FUTURE.

www.gtsco-uae.com

GTS - Smart & Sustainable Solutions

SMART & SUSTAINABLE SOLUTIONS

EXECUTIVE CONTROL TOWER SERVICES

ONE VIEW. SMARTER DECISIONS. BETTER OUTCOMES.

GTS Executive Control Tower delivers **real-time visibility**, **intelligence** and **actionable insights** across operations, assets, sustainability and service performance—empowering leaders to make **faster, data-driven decisions** with confidence.

SERVICES

Unified Operational Dashboard

Consolidated real-time view of all facilities, assets, alerts, and work orders.

Executive KPI Dashboards

High-level KPIs on performance, uptime, availability, costs and efficiency.

SLA Dashboards

Monitor SLA performance, compliance, breaches and service delivery.

ESG Dashboards

Track sustainability KPIs including energy, emissions, PUE and compliance.

Asset Health Scoring

AI-driven health scores to predict issues and optimize asset lifecycle.

Operational Analytics

Advanced analytics and reporting for trend analysis and strategic planning.

KEY BENEFITS

Single Source of Truth

Unified data from all systems in one place.

Faster Decision Making

Real-time insights for proactive leadership.

Performance Optimization

Monitor, analyze and improve operational efficiency.

Risk Mitigation

Identify issues early and ensure compliance.

Sustainable Impact

Drive ESG goals and long-term business value.

POWERING INTELLIGENT LEADERSHIP

REAL-TIME VISIBILITY

Across people, process and technology.

ACTIONABLE INSIGHTS

Turn data into decisions that drive impact.

OPERATIONAL EXCELLENCE

Improve uptime, efficiency and customer experience.

COST OPTIMIZATION

Reduce costs and maximize resource utilization.

SUSTAINABLE FUTURE

Build resilient, responsible and sustainable operations.
