

# Smart Protection Digital Trust

Securing Today. Empowering Tomorrow.

[www.webnet-ally.com](http://www.webnet-ally.com)

# What We Do

Webnet Ally is dedicated to **strengthening the security** and **resilience** of your digital environment.

We deliver advanced **offensive and defensive** cybersecurity services to protect your network, applications, systems, and data from sophisticated threats.

## Our Focus

### Protect

Securing your digital assets against evolving threats.

### Detect

Proactive threat detection across your environment.

### Respond

Rapid response and remediation to minimize impact.

### Strengthen

Continuous improvement of your security posture.

### Trust

Building long-term digital trust through reliability and expertise.

# What We Believe

At Webnet Ally, we empower organizations with **resilient cybersecurity** and **intelligent networking** solutions.

Built on trust, innovation, and integrity, we go beyond expectations to deliver measurable value and long-term partnerships that drive your success in the digital era.

## • Our Core Values •

### TRUST

We build lasting relationships through transparency and reliability.

### CUSTOMER FOCUS

We listen, understand, and deliver solutions tailored to your needs.

### INNOVATION

We embrace innovation to solve complex challenges.

### EXCELLENCE

We are committed to delivering quality in everything we do.

### INTEGRITY

We act with honesty, ethics, and respect in all our actions.

### RESPONSIBILITY

We take responsibility for our impact on clients, communities, and the planet.

# Webnet Ally

## Customer Centric of Resilience

Empowering your business with a secure, resilient, and future-ready digital foundation.

**Security First**  
Protect what matters most.

**Customer Focused**  
Your success is our priority.

**Proven Expertise**  
Deep experience. Real results.

**Innovative Solutions**  
Future-ready technologies.

**Trusted Partnership**  
Building resilience together.

# OUR DNA

Built on purpose. Driven by outcomes.

We partner with our customers to achieve their specific business **outcomes** — not just offering solutions and products.

## INNOVATION FIRST

We address customer needs through new technologies and innovative ideas.

## CUSTOMER JOURNEY FOCUS

We seek competitive differentiation through every step of the customer journey and experience.

## TAILORED COMMUNICATION

We deliver the right message to the right customer at the right time based on their business needs.

## OUTCOME DRIVEN

Our main objective is customer satisfaction in all interactions and delivery cycles.

## DISCOVER & UNDERSTAND

We explore and uncover customer needs to leverage the right products and services for the best outcomes.

## CUSTOMER-CENTRIC CULTURE

We embed customer-centric thinking across all functions through collaboration and ownership.

## TRUST

We build trust through transparency and reliability.

## COLLABORATION

We work together as one team to create lasting value.

## IMPACT

We deliver measurable results that matter.

## EXCELLENCE

We are committed to quality, continuous improvement, and high performance.

## RESPONSIBILITY

We protect our customers, communities, and the future.

# Webnet Portfolio & Service Offerings

End-to-end cybersecurity and digital solutions, engineered to **protect**, **connect**, and **empower** your business.

## Comprehensive Solutions

Covering your entire digital ecosystem

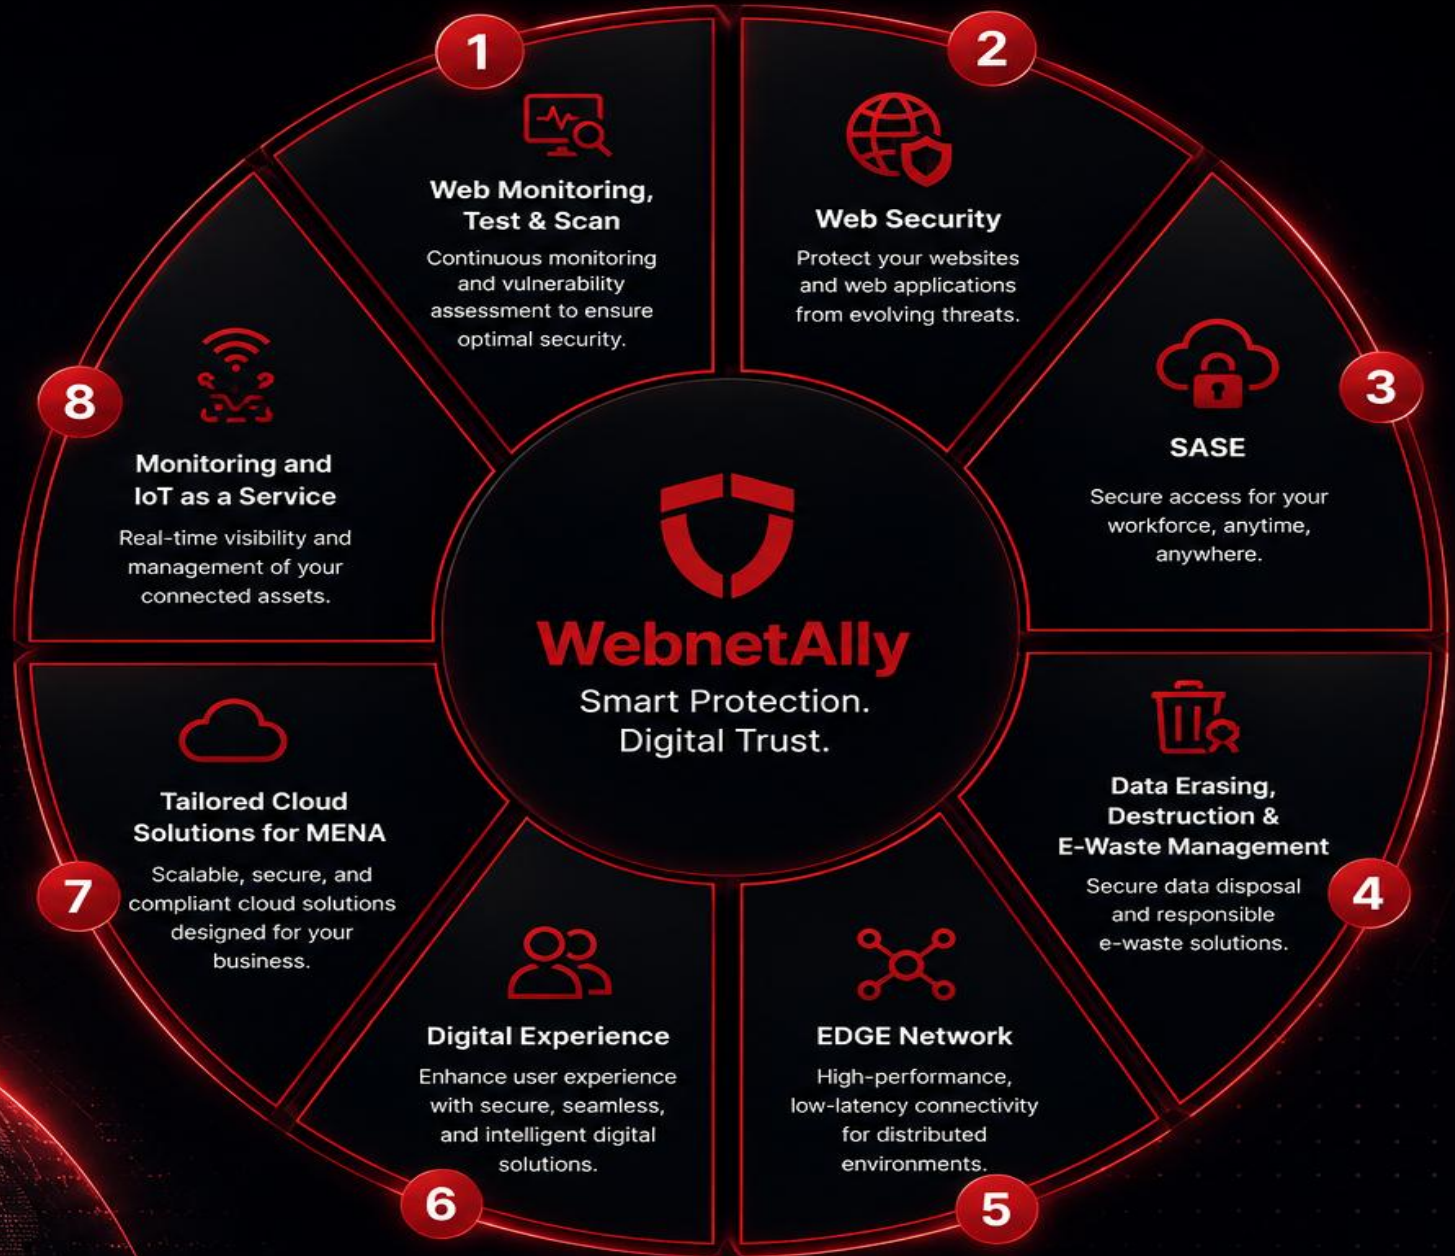

## Business Focused

Aligned with your goals and outcomes

## Future Ready

Built to scale with innovation

# WEBNET ALLY DIGITAL TRUST

END-TO-END DIGITAL TRUST, CYBER RESILIENCE, AND SECURE DIGITAL TRANSFORMATION CAPABILITIES.

Webnet Ally delivers a comprehensive cybersecurity ecosystem designed to secure applications, networks, cloud infrastructure, and digital services while enabling high performance, resilience, and digital trust.

### 1 Webnet Ally Cyber Fusion Security Operation

On-prem and Cloud-native platform protecting web, cloud and digital platforms.

#### Cyber Operation

- Threat detection
- Threat correlation
- Security automation (SOAR)
- Log aggregation
- Incident management

#### WDR - Web Detection & Response

- Behavioral analytics
- Real-time threat blocking
- API anomaly detection
- Web attack detection

#### NDR - Network Detection & Response

- Network behavior analysis
- East-west network visibility
- Encrypted traffic analysis
- Signature & behavior-based detection

#### XDR - Extended Detection & Response

- Unified detection & response across:
  - Web applications
  - Cloud infrastructure
  - FIM
  - Endpoints
  - Network
  - Identity systems
  - BYOD

#### NOC as a Service

- 24x7 infrastructure monitoring
- Network operations
- Cloud operations
- Performance monitoring
- SLA monitoring

### 7 WAN as a Service

Unified networking & security architecture for modern distributed enterprises.

- ✓ Global MPLS connectivity
- ✓ Global cloud connectivity
- ✓ SD-WAN as service
- ✓ Local cloud access
- ✓ Secure branch connectivity
- ✓ High available & resilience services

### 2 Web Security as a Service (WSaaS)

On-prem & Cloud-native protection for modern web applications and APIs.

- ✓ WAF as a Service
- ✓ Bot protection
- ✓ Layer 7 DDoS mitigation
- ✓ API security protection
- ✓ Threat intelligence
- ✓ Security posture dashboard
- ✓ Managed Service

### 3 Web Acceleration & Performance as a Service

Optimizes digital experience and website performance globally.

- ✓ Multi-CDN acceleration
- ✓ Real User Monitoring (RUM)
- ✓ Synthetic performance testing
- ✓ Image & asset optimization
- ✓ Edge computing optimization
- ✓ Web application acceleration and performance optimization

### 4 Monitoring, Scan & Security Validation

Continuous monitoring and security validation for all digital assets.

- ✓ Website uptime monitoring
- ✓ API monitoring
- ✓ Web scanning (WAST, SAST, DAST)
- ✓ Dark web monitoring
- ✓ Domain & certificate monitoring
- ✓ Attack surface management
- ✓ Webnet Ally Cyber Fusion Platform

### 5 Test as a Service (TaaS)

Advanced cybersecurity testing services.

- ✓ Performance testing
- ✓ Web penetration testing
- ✓ Mobile application security testing
- ✓ API penetration testing
- ✓ Load and stress testing
- ✓ LLM security penetration testing
- ✓ Red team exercises
- ✓ Cloud security assessments
- ✓ CCTV and IoT penetration testing

### 6 Edge Network as a Service

Modern global edge infrastructure delivering high-performance content delivery and protection.

- ✓ CDN edge caching
- ✓ Global traffic routing
- ✓ DNS acceleration
- ✓ DDoS protection (L3)
- ✓ Image optimization
- ✓ Latency reduction

### 8 SASE as a Service

Secure Access Service Edge

- ✓ SD-WAN
- ✓ Secure Web Gateway (SWG)
- ✓ Cloud Access Security Broker (CASB)
- ✓ Firewall as a Service (FWaaS)
- ✓ Zero Trust Network Access (ZTNA)
- ✓ Secure remote workforce connectivity

### 9 OT / IoT / IIoT & Application Security

Expanding beyond digital to operational systems

#### OT Security

- ICS/SCADA security
- Network segmentation
- Threat detection in OT environments

#### IoT Security

- Smart device security
- Firmware analysis
- IoT threat modeling
- Cloud IoT platform security

#### Application Security

- Secure SDLC implementation
- DevSecOps integration
- API security gateway
- Code review
- Threat modeling

### 10 E-Waste as a Service

- ✓ Secure Data Wiping (BitRaser)
- ✓ Degaussing
- ✓ Destruction of HDDs/SSDs
- ✓ Shredding

### 11 Managed CyberSecurity Services

Enterprise-grade managed security services delivered through the Cyber Fusion Center.

- ✓ Managed Web Security
- ✓ Managed SASE
- ✓ Managed WAF
- ✓ Managed SOC
- ✓ Managed Network
- ✓ Managed Cloud Security
- ✓ Managed Application Performance
- ✓ Managed API Gateway Security
- ✓ Managed DDoS Protection

**Unified Protection**  
Across Digital Ecosystem

**24x7 Operations &**  
Rapid Response

**High Performance**  
& Reliability

**Risk Reduction &**  
Compliance

**Scalable, Flexible &**  
Future Ready

**Smart Protection**  
**Digital Trust**

# Webnet Ally

## Cyber Fusion Center

An integrated security command center that fuses people, processes, and technology to detect, protect, and respond—faster, together.

### DETECT

Advanced threat detection

### PROTECT

End-to-end protection

### RESPOND

Rapid incident response

### COLLABORATE

Unified team collaboration

Unified Security. Real-time Intelligence. Stronger Together.

24/7 Threat Monitoring

Advanced Threat Intelligence

Automated Response

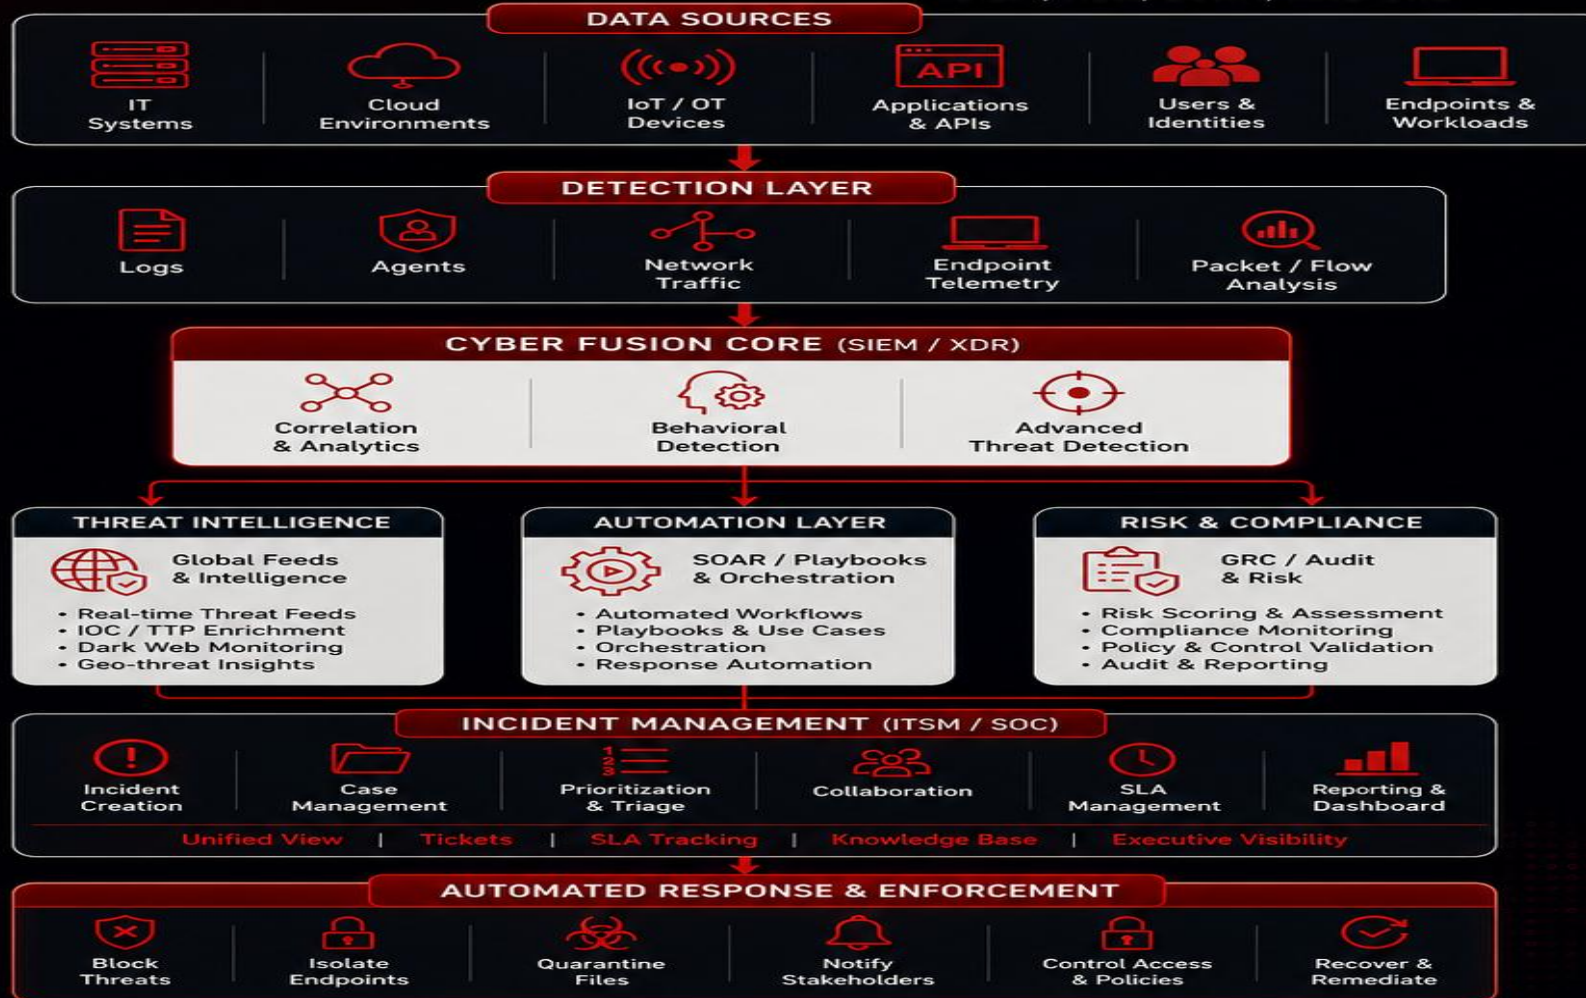

Proactive Risk Management

Continuous Security Improvement

**24x7 CYBER FUSION SOC**  
Continuous monitoring and rapid response by security experts

**AI / ML POWERED**  
Advanced analytics and machine learning for accurate detection

**SCALABLE & FLEXIBLE**  
Cloud-native architecture for elastic scalability

**SECURE BY DESIGN**  
Built with zero trust principles and best practices

**COMPLIANCE READY**  
Aligned with global standards and regulatory frameworks

## WEBNET ALLY VALUE PROPOSITION

- ✓ Unified Cyber Fusion Platform (SIEM + XDR + SOAR + GRC)
- ✓ Transition from SOC → Digital Trust Architecture
- ✓ AI-driven automation & response

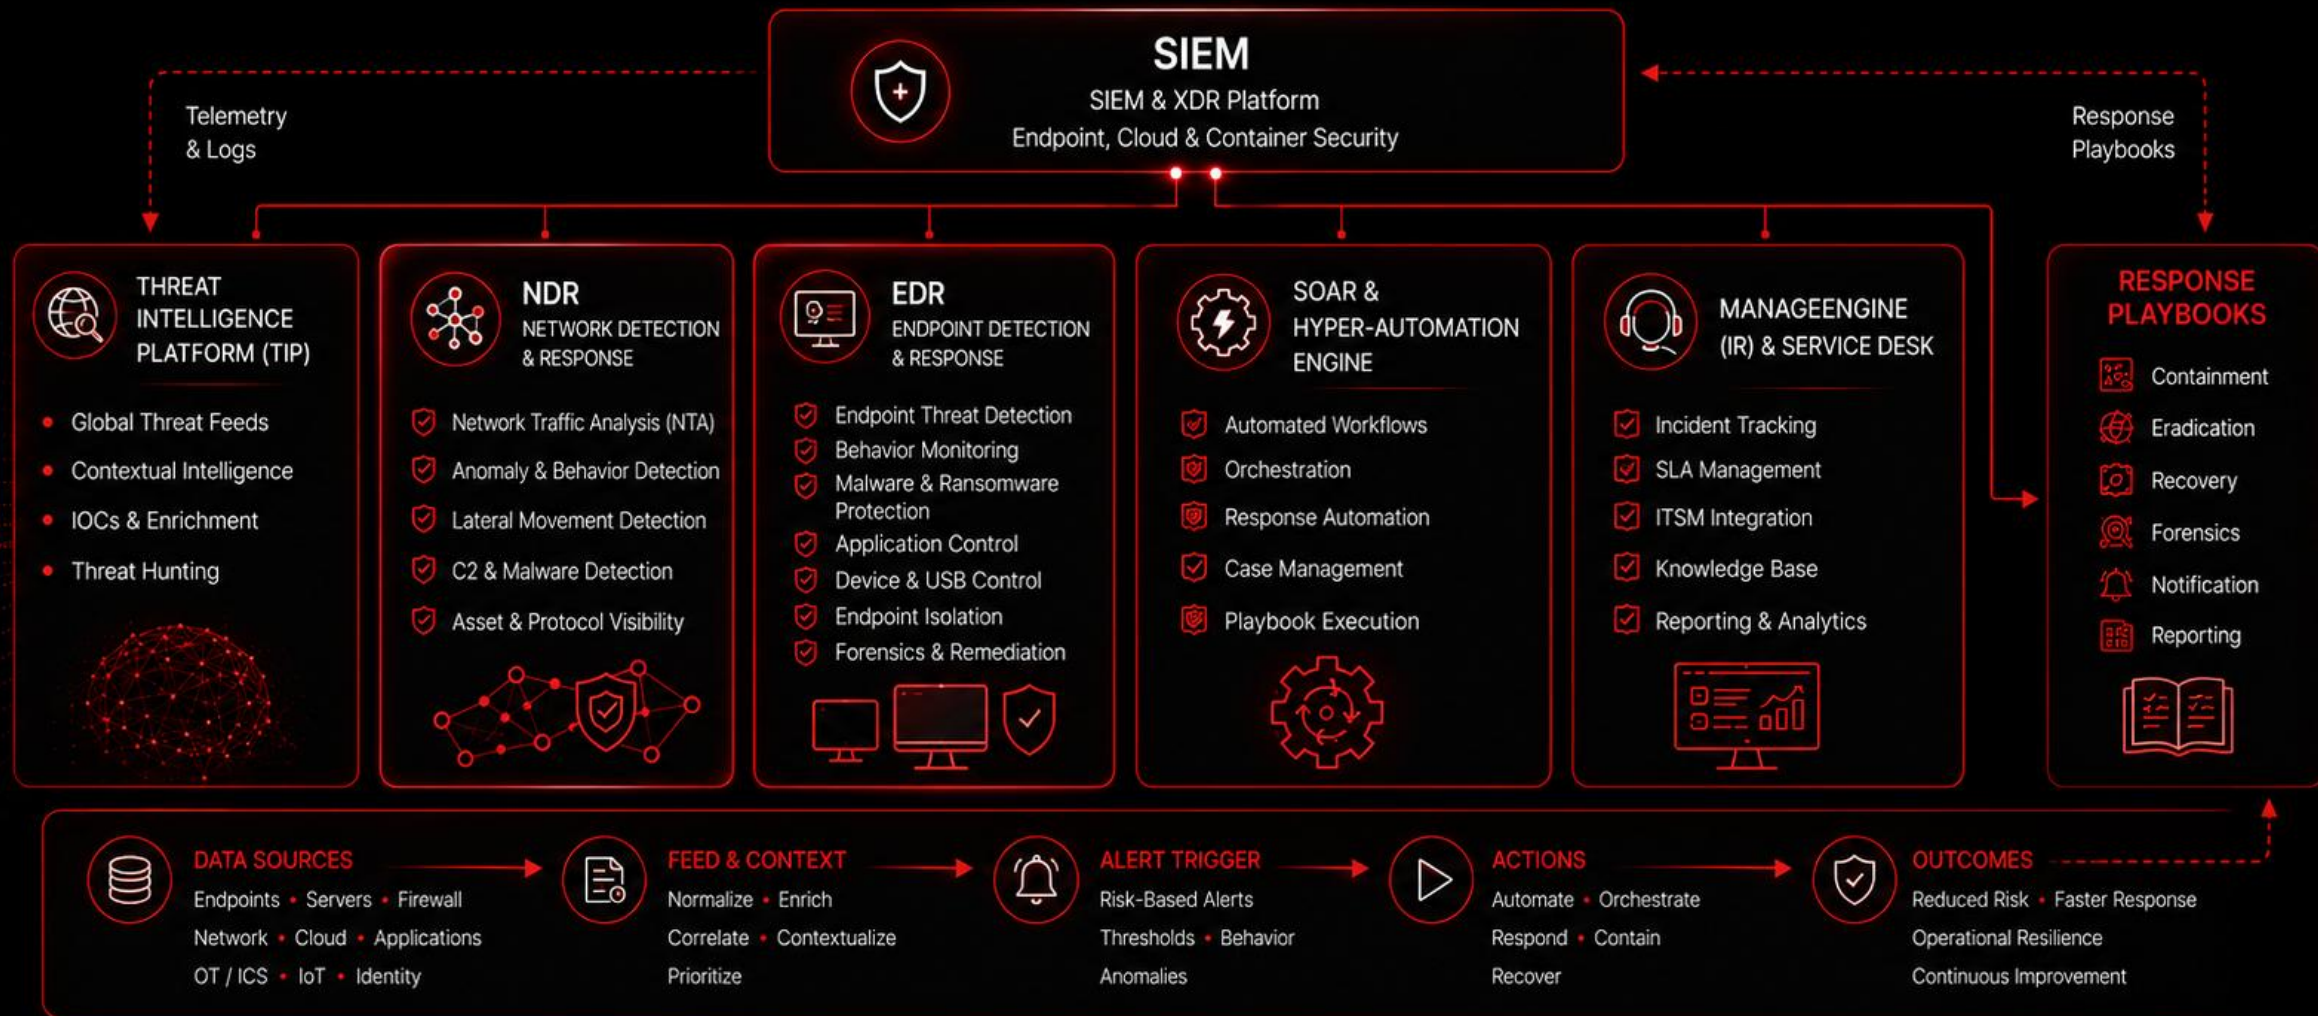

- ✓ Risk-based cybersecurity aligned with business outcomes
- ✓ Full compliance alignment (KSA, UAE, Global standards)

- ✓ Advanced Cybersecurity Services
- ✓ Services powered by Cyber Zones
- ✓ Solutionive **CyberFones**

# Our Core Architecture: A Synarrastic Security Stack

A modular, integrated approach for maximum visibility and automated response

**UNIFIED VISIBILITY**  
Across IT, OT & Cloud

**NETWORK DETECTION & RESPONSE (NDR)**  
Real-time Threat Detection across the Network

**ENDPOINT PROTECTION & RESPONSE (EDR)**  
Detect, Investigate & Respond across Endpoints

**AUTOMATED RESPONSE & ORCHESTRATION**  
Reduce MTTD & MTTR

**INTEGRATED WORKFLOW**  
SIEM • TIP • NDR • EDR  
SOAR • ITSM • ManageEngine

**OPERATIONAL EXCELLENCE**  
Efficiency • Compliance • Resilience

# Web Monitoring, **Test & Scan**

Comprehensive monitoring, testing, and scanning solutions to strengthen the security, performance, and reliability of your web assets and digital services.

01

## Web Security Test

Identify vulnerabilities and security gaps in your web applications and infrastructure. Our testing ensures your digital assets are secure, resilient, and protected against evolving threats.

Business  
Continuity

Ensure the security, reliability, and performance of your digital presence with **Webnet Ally**.

# Web Security

Comprehensive security solutions to protect web applications, data, and digital assets from evolving threats and vulnerabilities.

## Intrusion Detection and Prevention Systems (IDPS)

Detect and block malicious activities and prevent unauthorized access.

## Identity and Access Management (IAM)

Manage user identities and control access to critical resources securely.

## Data Loss Prevention (DLP)

Protect sensitive data and prevent unauthorized sharing or exfiltration.

## Secure Web Gateways (SWG)

Filter web traffic and enforce security policies across the organization.

## Managed Service for Security

Expert monitoring, threat detection, and response to keep you secure 24/7.

## Firewall

Network protection with advanced firewall policies and threat filtering.

## API Security

Secure and monitor APIs to prevent abuse and attacks.

## Digital Certificate SSL

Ensure encrypted communications and establish trust.

## API Security

Discover, secure, and manage APIs across the lifecycle.

## DDoS Protection and Mitigation

Detect and mitigate DDoS attacks to ensure business continuity.

## Web Application Firewall (WAF)

Protect web applications from OWASP top 10 risks and other threats.

## Bot Protection

Detect and block malicious bots and automate threat prevention.

## Hosting Secure Access

Secure remote access and protect hosted environments.

## CDN

Deliver content faster and securely with global distribution.

## SOC as Service

24/7 monitoring, threat detection, and incident response by experts.

# SASE

Secure. Agile. Everywhere.

Webnet Ally SASE delivers a cloud-native approach that converges network and security services to protect your users, applications, and data—anytime, anywhere.

## Webnet Ally SASE

- Unified Network & Security
- Cloud-Native Architecture
- Better Performance & User Experience
- Reduced Complexity & Cost
- Secure Access Anywhere

# EDGE NETWORK

Webnet Ally Edge Network as a Service for web hosting leverages distributed edge infrastructure to deliver web content and services closer to end-users.

In today's fast-paced digital world, delivering high-performance web applications is crucial for ensuring customer satisfaction and business success. Edge Network as a Service revolutionizes web application hosting by bringing your applications closer to users—no matter where they are.

## All in One Edge Platform for Better Delivery

### CDN

Dynamic content delivery network for faster performance.

### Load Balancers

Distribute traffic efficiently for high availability.

### DNS Hosting

Reliable and scalable domain name system management.

### DDoS Protection

Advanced protection against DDoS attacks and threats.

### Web Application

Secure, optimized, and high-performance application delivery.

Delivering speed, reliability, and security at the edge—empowering your business to stay ahead.

# E-Waste Management

We deliver secure, compliant, and environmentally responsible e-waste management solutions. Using advanced technologies and certified processes, we help organizations safely dispose of and recycle IT assets while protecting data, ensuring regulatory compliance, and contributing to a sustainable future.

## Secure Hard Drive Erasure & Overwriting

Permanently erase data using industry-standard methods to ensure complete data protection.

## Hard Drive Destruction & Electronic Waste

Physically destroy storage devices and electronic components to eliminate any risk of data recovery.

## Disposal of E-Waste

Responsible disposal through certified partners in full compliance with environmental regulations.

## Data Wiping with Certificate

Certified data wiping with verifiable reports for compliance and peace of mind.

## SSD & IT Asset Shredding

Secure shredding of SSDs and IT assets to ensure data is irrecoverable and assets are fully decommissioned.

## Destruction with Verification System

End-to-end verification with audit trails and certificates for complete transparency and accountability.

### Data Security

Protect sensitive data at every step.

### Regulatory Compliance

Meet local and international environmental standards.

### Environmental Responsibility

Promote recycling and reduce electronic waste.

### Certified Processes

Industry-approved methods with verifiable results.

### End-to-End Service

Collection, destruction, disposal, and certification.

# Smart & Digital Healthy Environment Solutions

We deliver intelligent solutions that improve operational **efficiency**, **sustainability**, and **safety** across industries.

By leveraging advanced technologies such as AI, IoT, automation, and real-time analytics, we empower organizations to make smarter decisions, reduce costs, and create a safer, greener environment.

Our solutions are built for seamless integration, scalability, and ease of use—ensuring measurable impact from day one.

## Assets Management Service

Track, manage, and optimize your assets across their lifecycle for maximum value and performance.

## Critical Facility Resilience & Digitalization

Enhance facility resilience with smart digital systems for business continuity and operational safety.

## Monitoring IoT as Service

Real-time monitoring of your IoT devices and environment to ensure performance, safety, and reliability.

## CMMS

Computerized Maintenance Management System to streamline maintenance operations and reduce downtime.

## Smart Solutions

Smart, connected solutions that improve efficiency, reduce energy consumption, and support sustainability.

## E-waste Management as Service

Responsible and compliant e-waste collection, recycling, and disposal for a cleaner and safer environment.

### Operational Excellence

Improve performance and reduce downtime.

### Sustainability

Drive eco-friendly practices and reduce environmental impact.

### Safety First

Ensure the safety of people, assets, and operations.

### Data-Driven Decisions

Leverage real-time data for smarter, faster decisions.

### Scalable & Integrated

Seamlessly integrate with your systems and scale with your growth.

# Monitoring with IoT Solutions

We leverage the power of the Internet of Things (IoT) to proactively identify potential issues, **optimize** resource utilization, and **enhance** overall efficiency—**minimizing** downtime and **maximizing** return on investment.

Our continuous monitoring of critical parameters enables **proactive identification** and **resolution** of issues before they escalate into costly outages.

We deliver innovative, smart solutions that enhance operational **efficiency**, **sustainability**, and **safety** across various industries. By leveraging advanced technologies, including **artificial intelligence**, **automation**, and **real-time data analytics**, we deliver tangible value and drive smarter decision making for our clients.

**Seamless Integration** | **Real-Time Insights** | **Smarter Decisions**

**01**

## Environmental Monitoring

Monitor environmental conditions in real-time to ensure a safe and healthy environment.

**02**

## Power Monitoring

Track power usage and quality to optimize performance and reduce energy costs.

**03**

## Security & Access Control

Monitor and manage access in real-time to strengthen security and prevent unauthorized entry.

**04**

## Safety & Fire Detection

Detect fire hazards early and ensure rapid response to protect lives and assets.

**05**

## Fluid Level Monitoring

Monitor liquid levels in tanks and pipelines to prevent overflow, leakage, and downtime.

**06**

## Advance Sensor Integration

Integrate advanced sensors for accurate data collection and real-time operational visibility.

**07**

## Data Analytics & Reporting

Transform data into actionable insights with advanced analytics and automated reporting.

# Cyber Zones and **VARROW** Integration

Webnet Ally enables organizations to move from fragmented cybersecurity operations to a unified Digital Trust architecture powered by **Cyber Fusion**.

**CYBER ZONES**  
DIGITAL ZONES CONSULTING

**VARROW**

Unified Security  
Operations

AI-Driven  
Cyber Fusion

Integrated

Digital Trust  
& Compliance

Protect • Detect • Respond • Comply • Evolve

Empowering Organizations with Integrated Cybersecurity Consulting, Intelligence & Resilience

## WHO WE ARE

Cyber Zones is a specialized cybersecurity consulting firm providing advisory, assessments and investigation services to help organizations strengthen their security posture and comply with regulatory requirements.

Founded in 2017 and headquartered in Amman, Jordan, we support enterprises and government entities in protecting digital assets and managing cyber risks across the Middle East.

In collaboration with **Webnet Ally's Cyber Fusion Center** and **Digital Trust platform**, we deliver deep cybersecurity consulting and investigation capabilities to build secure, compliant and resilient digital environments.

## 1 GOVERNANCE, RISK & COMPLIANCE (GRC)

- Cyber Governance & Risk Frameworks
- Compliance with ISO, NCA, SAMA & PDPL
- Privacy & Data Protection
- Audit, Monitoring & Regulatory Readiness

## 2 ASSESSMENT & READINESS

- Vulnerability Assessment & Penetration Testing
- Red Team / Adversary Simulation
- Security Architecture & Gap Assessment
- Cyber Resilience & Ransomware Readiness

## 3 THREAT INTELLIGENCE & MONITORING

- Dark Web & OSINT Monitoring
- Exposure & Threat Visibility
- Risk-based Threat Intelligence

## 4 DIGITAL FORENSICS & INCIDENT RESPONSE (DFIR)

- Cyber Incident Investigation
- Disk, RAM & Network Forensics
- Compromise Assessment
- DFIR Program & Forensics Lab Setup

## 5 CYBER RESILIENCE & PREPAREDNESS

- Incident Response Planning
- Business Continuity Alignment
- DDoS & Ransomware Resilience
- Crisis Management Support

## 6 AWARENESS & ADVISORY

- Security Awareness Programs
- Phishing Simulations
- vCISO / vISO Services
- Policy & Governance Frameworks

## INTEGRATION WITH WEBNET ALLY CYBER FUSION

**CYBER FUSION CENTER (SOC)**  
24/7 Monitoring & Threat Detection

**SIEM / XDR & SOAR INTEGRATION**  
Detection, Correlation & Automated Response

**GRC & COMPLIANCE FRAMEWORKS**  
Risk Management, Audit & Reporting

**THREAT INTELLIGENCE & INVESTIGATIONS**  
External Threats, Dark Web & Attack Surface Visibility

**RISK & ASSURANCE SERVICES**  
Assessments, Testing & Continuous Assurance

Cyber Zones extends Webnet Ally capabilities by combining consulting expertise and operational excellence into one unified **Digital Trust** model.

## BUSINESS VALUE

Strong Compliance Posture

Reduced Cyber Risk Exposure

Faster Incident Response

Improved Resilience & Preparedness

Executive-level Visibility

Trusted, Secure & Compliant Operations

## OUR COMMITMENT

Cyber Zone enables organizations to achieve **Digital Trust** by combining governance, risk management, threat intelligence, and cyber resilience into a unified framework.

Founded in  
**2017**

Headquartered in  
**Amman, Jordan**

Serving Enterprises &  
Government Entities

Expert. Trusted.  
Resilient.

**Building Digital Trust. Strengthening Cyber Resilience.**  
Together with Webnet Ally.

# Unique **Webnet Ally** Product Portfolio

(Powered by Cyber Zones)

Through our ecosystem, we provide a comprehensive set of advanced capabilities:

## **CZ Sentinel™**

**External Attack Surface  
& Exposure Intelligence**

Continuously discovers, monitors and analyzes external threats and exposures across your digital footprint.

## **CZ REI™ Platform**

**Risk & Exposure Intelligence**  
(prioritizing what truly matters)

Prioritizes and correlates risk and exposures to deliver actionable intelligence for confident decisions.

## **CZ TMA™ Platform**

**Digital Forensics &  
Evidence Intelligence**  
(fraud detection & validation)

Extracts, analyzes and validates digital evidence to uncover fraud, threats and policy violations.

## **CZ MailGuard™**

**Email & Human Risk Intelligence**  
(pre-click protection)

Protects users and organizations from email-borne threats and human risk with AI-powered pre-click security.

## **Cyber Fusion Center**

All seamlessly integrated into the  
Cyber Fusion Center

Integrated  
Intelligence

Unified  
Response

Real-time  
Visibility

Collaborative  
Defense

## VArrow Core Services

### Cloud Services

- Public / Private / Hybrid Cloud
- Multi-cloud Architecture
- Cloud Migration & Modernization

### Infrastructure Services

- Data Center & Virtualization
- Storage & Compute Optimization
- High Availability & Disaster Recovery

### Managed Services

- 24/7 Operations & Monitoring
- Managed Cloud & Infrastructure
- Performance & Capacity Management

### DevOps & Automation

- CI/CD Pipelines
- Infrastructure as Code (IaC)
- Platform Automation & Orchestration

### Cloud Security

- Cloud Security Posture Management
